

Clinic Expansions/Renovations Community Health Care Systems, Inc., Wrightsville, GA

TM Osborn Associates, Inc. is providing Preliminary Facility Planning services for the clinics operated by Community Health Care Systems of Wrightsville, Georgia.

These clinic settings are experiencing overcrowding as additional practitioners are brought on board to serve the growing patient population. Facilities are also in need of upgrades in order to respond to patient privacy concerns, access for persons with disabilities and infrastructure improvements.

TM Osborn's planning and pre-design services provide conceptual and schematic drawing solutions that can be executed by local Design-Build firms or Contractors. Studies provided to CHCS for their clinics have resolved expansion and site development opportunities.
