

# Ambulatory Surgery Center Jackson Hospital, Montgomery, AL

---

TM Osborn Associates, Inc. provided a feasibility study to place a hospital-physician joint venture Ambulatory Surgery Center on this Hospital's expanding campus. The study provided options for site selection, budget cost estimate preliminary space program and a conceptual building layout.

Following the decision to move forward with the project, the Hospital requested TM Osborn to provide Design Requirements Detail Drawings to facilitate the development of a fully functional ASC. The Center includes 6 ORs, 4 minor procedure rooms and complete patient preparation and recovery facilities.

Architect: Birchfield Penuel & Associates
