

Site and Facility Master Plan VAMC North Las Vegas, NV

Following completion of the design of the new North Las Vegas Department of Veterans Affairs Medical Center, the VA Southern Nevada Healthcare System saw the need for a more comprehensive vision of the future for its 160-acre site. EBA, Ernest Bland Associates was selected to develop a complete master plan, including site and facilities utilization for the 10-year period, following the opening of the Medical Center. TM Osborn was the healthcare Facility Planning Consultant to the team.

The completed plan defines a phased development of site and facilities through 2022. Included are expansions of critical clinical and support services as well as provision for many new program initiatives. Infrastructure development to support the doubling of building area to 1.8 Million gsf was described within the 42 major projects' time line.

Master-Planned development includes:

- 250,000 gsf Ambulatory Care Addition
- 96-Bed Patient Tower Addition with D&T services below
- Major Clinical Renovations
- CLC Addition to 240 Beds Total
- New Fisher House, Hoptel, Medical Education Complex
- Central Energy Plant Additions
